

Invora Ai

A GLOBAL **AI-DRIVEN, MARKET- NEUTRAL TRADING **ECOSYSTEM****

This Is The Key To The World Of Technology
For Both Beginners & Experienced Users!

MONETIZING LEVERAGE, NOT PRICE

EXECUTIVE OVERVIEW

INVORA AI is a market-neutral, AI-integrated trading ecosystem designed to generate consistent yield from crypto derivatives without speculating on price direction.

Instead of predicting markets, **INVORA AI** monetizes structural inefficiencies created by leveraged traders in perpetual futures markets.

No bullish
or bearish bias

No price
prediction

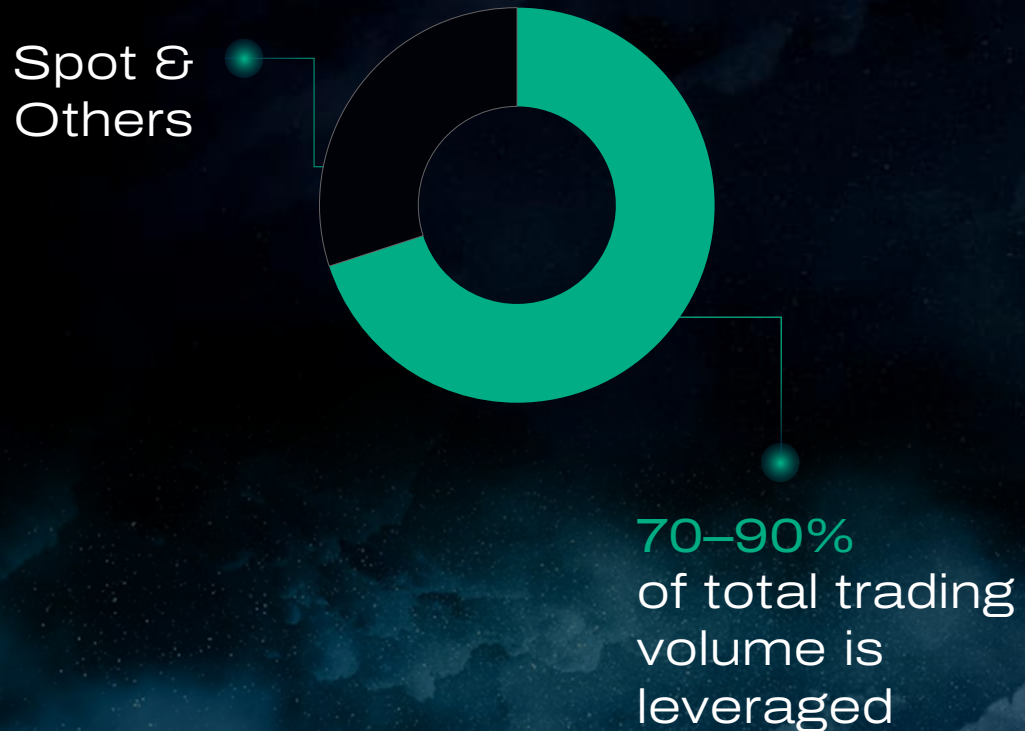

No emotional
trading

THE MARKET REALITY

Crypto markets are dominated by perpetual futures.

- Most traders pay funding
- Very few systems are built to collect it neutrally.

MARKET OPPORTUNITY

Traditional Trading Systems

- Depend on price direction
- Rely on indicators or narratives
- Break during volatility

Funding is a guaranteed cash flow mechanism, yet

- Retail traders lack value into funding
- Institutions quietly harvest it
- Retail lacks access to neutral infrastructure

HOW INVORA AI FILLS THE GAP

INVORA AI deploys a delta-neutral funding yield strategy

- Simultaneous long and short positions
- Equal size, equal leverage
- Zero net price exposure

Returns are driven purely by funding flows, not price movement.

This makes INVORA AI

-  Market neutral
-  Regime-agnostic
-  Structurally profitable

INVORA VISION

To become the world's leading AI driven, market neutral financial ecosystem, transforming how capital earns yield by replacing speculation with intelligent, infrastructure level trading systems.

INVORA envisions a world where individuals and institutions access consistent, risk-aware returns powered by real-time market intelligence, not price prediction or emotional decision making. Helping people worldwide participate in the digital economy with confidence and long-term success.

INVORA MISSION

To provide, deploy, and scale AI integrated trading infrastructure that captures structural inefficiencies across global markets starting with crypto derivatives while maintaining strict market neutrality, capital preservation, and transparency risk-first architecture. **INVORA AI** empowers users to maximize their returns in a transparent and sustainable way.

Democratize institutional grade trading strategies

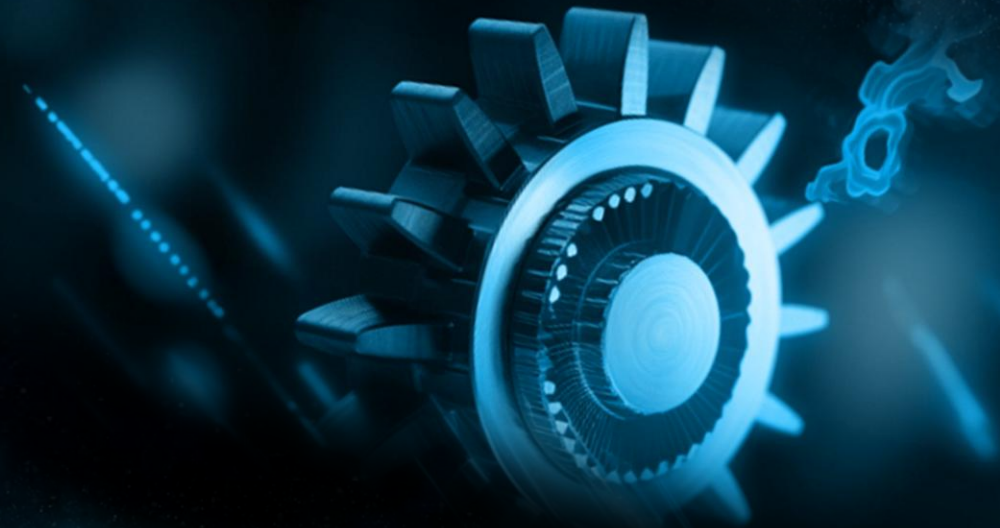

Eliminate dependence on price direction

Monetize leverage demand rather than market movement

Deliver transparent, sustainable yield through automation

ABOUT INVORA AI

- INVORA AI is a precision-engineered, AI-driven market-neutral trading ecosystem, purpose-built to systematically monetize funding flows in perpetual futures markets, rather than relying on speculative price direction.
- Developed and operated by INVORA CAPITAL LTD, an approved investment manager regulated under the British Virgin Islands Financial Services Commission (BVI FSC), the platform integrates real-time funding intelligence, delta-neutral execution, and institutional-grade risk controls to deliver transparent, price-agnostic yield across all market conditions.
- INVORA does not attempt to predict market direction. Instead, the system is designed to consistently capture funding fees paid by leveraged participants in futures markets, positioning itself on the receiving side of these structural cash flows.

INVORA AI is led by professionals with global expertise in technology, finance, digital markets, & AI.

WITHDRAWAL & LOCKUP RULES

Capital Lockup

Seed capital remains actively traded for a **90-day period**.
Withdrawing prior to this maturity incurs a **15% deduction**.

New Deposit

New deposits initiate a **fresh 90 days lock** (existing funds unaffected)

Minimum withdrawal

The Minimum withdrawal you can request is **\$10**.

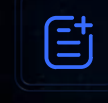

Withdrawal fee

Every withdrawal has a **2% processing** fee. This covers network and processing costs.

Full Withdrawal

License termination(re-entry requires new licenses)

Post 90-day lock

No early withdrawal penalty after 90 days (2% processing fee still applies)

SYSTEM DEMONSTRATION

Transparency is not optional at INVORA AI, it's the foundation of our system integrity.

- Seed capital = \$1,000. User withdraws before 90 days
- Early withdrawal penalty (15%): $1,000 \times 0.15 = \$150$.
- Remaining after penalty: $1,000 - 150 = \$850$.
- Withdrawal fee (2%) on the remaining: $850 \times 0.02 = \$17$.
- Net amount user receives: $850 - 17 = \$833$.

Why these rules exist

They protect liquidity and keep the bots working well. They stop short-term abuse and make results predictable for all members.

TRANSPARENCY & REPORTING

Funding-First Transparency Framework

Invora Ai

INVORA AI is built on the principle that funding flows not speculative trades are the primary source of yield.

As a result, transparency at INVORA focuses on position structure, funding receipts, and risk exposure, not opaque trading decisions.

Every action taken by the system is visible, auditable, and exportable. Transparency is core infrastructure, not an optional feature.

WHAT MEMBERS CAN SEE (IN REAL TIME)

Funding-First Transparency Framework

Live Position & Funding Dashboard

Open long and short positions (paired view)

Net exposure (always displayed as zero or near-zero)

Live funding rates being collected

Upcoming funding settlement countdowns

Members see exactly how yield is being generated, not just results. This level of visibility & accountability is what sets INVORA CAPITAL LTD apart from many other investment platforms.
